What Were You Thinking?: Learning To Control Your Impulses

Synopsis

Third-grader Braden loves to be the center of attention. His comic genius, as he sees it, causes his friends to look at him in awe. But some poor decision-making, like ill-timed jokes in class and an impulsive reaction during gym that left a classmate teary-eyed and crumpled on the floor, forces the adults in Braden's life to teach him about impulse control. But will the lessons shared by his teachers and his mom really help Braden manage his impulses? Find out in this hilarious story by Bryan Smith.

What Were You Thinking? by Bryan Smith and illustrated by Lisa M. Griffin addresses common moments from a childâ™s life. As many parents and teachers can vouch, the answer to the title question is frequently that the child wasnâ™t thinking at all; they operated on impulse. Or, they were thinking but their behavior was highly unlikely to produce their expected result. This book helps kids see that doing the first thing that comes to mind may not be their best choice. It might even accomplish the opposite of their intended goal. It also shows how kids sometimes expect something to be funny when it can actually cause othersâ “classmates, teachers, coaches and parentsâ “ to be annoyed instead of entertained. Sometimes the âœcostâ • of the laughter they seek, far exceeds the momentary rush of any attention. The illustrations invite exploration of the bookâ™s theme and make obvious that Bradenâ™s idea of funny does not necessarily match his classmatesâ • feelings. This can lead to conversations about the range of responses one can see within an entire classroom of kids. What Were You Thinking? outlines a simple four step strategy which kids can practice to help them smooth out their responses and ensure that the result they get is the one which they want. A brief Tips for Parents and Educators is included which offers further information on how to guide children to develop better impulse control. Can also open conversation about intentions & how humor doesnâ™t lessen the pain of hurtful remarks/behavior. AQ Lens: Kids who have experienced trauma, grief and or loss may have weak impulse control, high distractibility. Or they may have been taught negative and/or inadequate behavior strategies.
