It's unfortunate that for a certificate study guide there seems to be quite a few errors and omissions that somehow got past both the author, editor, and publisher. I really wanted to rely on this book as the 'bible' for this certificate, but I'm at page 121 (of almost 500) and found some blatant mistakes/errors.The obvious one that is even mentioned here on is that the link to register the book and get supplemental material was printed wrong in the book. Use the link listed here on the book landing page, and then go through the obscure process of registering the book, getting an account, trading emails, to finally get to the stuff. Extra steps for no real reason.So, you want some examples?- Pg 121 author references 'Tool' that there are three of them, yet the book only outlines 2 of the 3, skipping over 'Backup' altogether.- Pg 45. Review question #4 refers to the correct answer as 'Device Stage'. I defy anyone to show me where 'Device Stage' is listed in the book...not the chapter, not the glossary, nowhere.- Pg 82. Author says the 'Next 3 exercises will help in creating virtual hard disks" starting with Exercise 2.7. The next 2 exercises are completely omitted, not even mentioned or referenced. Instead New Topic 'Creating Virtual Machines' is introduced. Huh?- Pg 154. Exam Question 4 inquires about 'features' of dynamic disks solely for Win 10. Explanation of Answer "D" (pg 496) instead talks about supports of all Win OS's that doesn't even come close to the Answer D on pg 155. This answer is way out of context.- Pg 298. Chap 6 Exam Question 10. According to the answer key on pg 499, the correct answers are B & C. However, the choices provided for C & D are exactly the same....WORD FOR WORD.
