# Spoken Dialogue Systems (Synthesis Lectures On Human Language Technologies)

## Synopsis

Considerable progress has been made in recent years in the development of dialogue systems that support robust and efficient human-machine interaction using spoken language. Spoken dialogue technology allows various interactive applications to be built and used for practical purposes, and research focuses on issues that aim to increase the system's communicative competence by including aspects of error correction, cooperation, multimodality, and adaptation in context. This book gives a comprehensive view of state-of-the-art techniques that are used to build spoken dialogue systems. It provides an overview of the basic issues such as system architectures, various dialogue management methods, system evaluation, and also surveys advanced topics concerning extensions of the basic model to more conversational setups. The goal of the book is to provide an introduction to the methods, problems, and solutions that are used in dialogue system development and evaluation. It presents dialogue modelling and system development issues relevant in both academic and industrial environments and also discusses requirements and challenges for advanced interaction management and future research. Table of Contents: Preface / Introduction to Spoken Dialogue Systems / Dialogue Management / Error Handling / Case Studies: Advanced Approaches to Dialogue Management / Advanced Issues / Methodologies and Practices of Evaluation / Future Directions / References / Author Biographies

## Book Information

Series: Synthesis Lectures on Human Language Technologies

Paperback: 166 pages

Publisher: Morgan and Claypool Publishers (November 12, 2009)

Language: English

ISBN-10: 1598295993

ISBN-13: 978-1598295993

Product Dimensions: 7.5 x 0.4 x 9.2 inches

Shipping Weight: 12 ounces (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #1,152,881 in Books (See Top 100 in Books) #96 in Books > Computers & Technology > Computer Science > AI & Machine Learning > Natural Language Processing  
#267741 in Books > Reference
